USER MANUAL

Before Using

What is include

- Equipment x 1
- Power cable with Plug x 1
- User manual x 1
- Iron holder x 2

Open Instruction

Help preserve the environment! Ensure that this product is recycled at the end of its life. Your supplier can give details of local arrangements for the disposal of products.

Please open the equipment carefully ,and check all the spare parts are included or not. If any part of the cause of the failure due to improper transportation or carton, please keep the packing materials and immediately inform the shipper to check. If the equipment must be returned to the factory, the equipment should be use the original carton and packaging.

AC Power Supply

The equipment power supply is able to adapt to the wide input voltage. Please confirm the input voltage is in the scale of rated voltage. The equipment can adapt to 100V-240V AC voltage, Frequency 50-60HZ. It can not run a rheostat (variable resistor) or dimmer circuits.

Safety Instruction

This product is I level protection equipment, so it is must be connected well and connected by the professional people.

- Make sure the volatage don't be above or below which the user manual rated values.
- Confirm the power cord is not a sword cut or damaged.
- Must be cut off the power supply in the condition of no using or cleaning.
- Only allowed with the power cord plug connection. Please do not force when unplug the power cord to pull the plug.
- Be careful in the process of installation of equipment. Avoid touching the bare wire, otherwise it will suffer fatal shocks.
- Don't look the light source directly,otherwise it will hurts the eyes.

- When choosing installation position of equipment and the equipment must be more than 0.5m distance between objects.
- Please use the equipment wires appropriate.
- Without the manufacturer's authorization or laypeople don't remove, repair and modification of equipment.
- ullet The maximum operating temperture is 40 $^{\circ}{\mathbb C}$, don't operate the equipment when it is over 40 $^{\circ}{\mathbb C}$
- Do not connect the equipment to the dimmer equipment.
- Under 120V voltage, output power don't series more than 10 pcs equipment, voltage 230V. Output power don't series more than 15 pcs

Introduction

Specification

Rated Voltage: AC100V~240V 50-60HZ

Rated Power: 450W

LED Qty: 19x15W high power 4 in 1 Osram LEDs

LED Drive Current: 1000mABeam Angle: 4-60°Zoom

• IP: IP20

DMX Mode: 21CH (Standard) /35CH(Shapes)/78CH(Extend) /97CH(Extend RGBW) /97 CH(Extend RGBW))/92CH(Full)

Net weight: 15 KgGross weight: 18.2Kg

Product feature

- XLR sockets input/output 3Pin
- Power input/output
- 3 kinds of control model: DMX512, Sound active, Master/slave
- LCD display screen
- Display screen can be turned upside down with 180° to fit the installation in different place
- Indoor operation temperature: -20°C∼+40°C
- 5 DMX modes: 21/35 /78/96/97/92CH
- dimmer:0-100% linear dimmer
- Pan/tilt:
 - ➤ 16bit fine pan/tilt control
 - Smooth and accurate locating
 - ➤ Pan: 540°Tilt:210°
 - > Motor rotation in forward and reverse can be setting up
- Each LED can be controlled individually, rich colour

- Smooth and accurate positioning
- > Tilt: 540°Pan270°rotation
- > Tilt,Pan high-speed infinite rotation,speed can be adjusted.
- The scanning position can be memory, it will be automatically reset without expected movement after rotation.
- 0-20HZ Strobe pulse strobe Asynchronous stroboscopic effect.
- Super mixed color and rainbow effect.
- All the color can be for the total dimmer.
- 7 programmable program is invoked by controller.
- Fan cooling(fan will be change the speed with the temperature variation.
 Temperature detecting system(If the temperature detection error, the light doesn't work).

Installation

Installation Requirements

- This equipment can be used in many places, it can hang and put on the ground.
- Choosing a suitable place to put or hang the equipment when installation. Must be use the special screws and hook to make sure the lamp's weight is in the weight range.
- When installing the equipment, ensure no inflammable and explosive goods at 0.5 meter distance.
- Please ask the professionals to install the equipment, any improper installation will cause personal injury or material damage.
- To prevent others entering the working ares below, the installation or maintenance of equipment with suitable and stable platform
- The equipment must be placed in ventilated place, at least 50 cm from the ground, please ensure that the vent without clogging.

Power supply connection

The equipment can be used in the wide voltage input. Please make sure the voltage is the scale of rated voltage when connecting the power. The equipment can adapt to 100V to 240 V AC voltage and 50-60 Hz.

- The front lens may be infinited rotation in foward and reverse
- 0-20HZ strobe
- Zoom range :4°-60°

DMX Signal Connection

- 1. Use DMX512 controller, use the DMX signal (male) to plug into the first lamp(female) 3 pin.
- 2. Put out of the equipment of the first signal wire(head), connected to the equipment of the next 3 pin plug(female), so on. See belowed pictures.

Rainbows

DMX channel value:23-24.

t simulates a rainbow effect.

The Shape Speed channel increases the speed and defines the rotation: from 126 (min speed) to 0 (max speed) counter clock wise rotation and from 129 (min speed) to 255 (max speed) clock wise rotation. With DMX value 127 or 128 the macro stays still.

For the macro 24 (Rainbow with fixed) the Shape Speed channel also defines angle offset (the orange sector starting angle)

Rotating shapes

DMX channel value: from 25 to 31.

Shapes available: Fan(3 arms). Bar (2 arms), Half Moon, Triangle, Two rotating bars of different colors, Two rotating arcs of different colors, Two rotating arcs of different colors and direction.

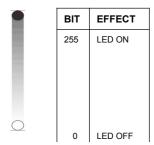

The Shape Speed channel increases the speed and defines the rotation: from 126 (min speed) to 0 (max speed) counter clock wise rotation and from 129 (min speed) to 255 (max speed) clock wise rotation With DMX value 127 or 128 the macro stays still.

The Shape Offset channel defines the angle offset from 0 (0 degree) to 255 (360 degree).

5	100 ms
0-4	No fade

Macro Off

DMX channel value: from 0 to 7.

No shape effects activated Turns off any previously selected shape

Static Rings

DMX channel value: from 8 to 14.

The ring or ring used by the macro are turned on with the foreground colour (Shape

Red+Shape Green+Shape blue+Shape White)

Avaliable combinations: Ring 1 On, Ring 2 On, Ring 3

Dynamic Rings DMX channel DMX **Dynamic Ring**

DMX channel value: From 15 to 18.

The ring used by the macro are turned on sequentially, simulating an opening, closing or both.

The Shape Speed channel increases the speed from 126 (min speed) to 0 (max speed) for the Closing and closing/opening effects and from 129 (min speed) to 255 (max speed) for the opening and opening/closing effects, With DMX value=127 or 128the macro stays still

The Shape Offset channel defines the macro effect diction over a number of fixtures

(affects also the behavior of a single fixture)

Dmx values from 0 to 9:continous distribution;

Dmx values from 10 to 255 random distribution of flash from 2 to 20 fixtures.

If foreground colors are all set to 0, the Random-Colors mode is activated

The color used by the macro changes at every restart.

Rings with variable radius

DMX channel value:19-20.

The Shape Speed channel defines the ring radius: 0=min, 255=max

Random pixels

DMX

Random pixels

DMX DMX channel value:21-22.

Leds are turned and off randomly.

The Shape Speed channel increases the speed and defines the fade fade effect for the leds: from 126(min speed) to 0(max speed) with a Instant-on/fade-out led effect and from 129 (min speed) to 255 (max speed)with a fade-in+fade-out led effect, At a DMX value of 127 and 128 the macro stays still.

For macro 21 the Shape Offset channel defines leds random distribution from 0 (2 fixtures) to 255 over a set of fixtures (20 fixtures)

For macro 22 the Shape Offset channel defines defines pixels density from 0 (min density) to 255 (max density)

If foreground colors are all set to 0 the Random-Colors mode is activated.

The Shape Smoothing channel adjusts the fading effect applied to the macro movement The color used by the macro changes at every restart.
